## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 36-50, drawn to a method (of anchoring), classified in class 52, subclass 741.1.
- II. Claims 12-35 and 51-55, drawn to an intermediate anchor system, classified in class 52, subclass 223.13.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be used with an anchor having additional features than those recited in the apparatus claims and the anchor can be used by any means deemed suitable to the user.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr David Reed on 5/24/04 on \*\*\* to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3635

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
